

CASSIDA LUBRICANTS – SOLUTIONS FOR THE MEAT & POULTRY INDUSTRY

CASSIDA food grade lubricants – Solutions for the Meat & Poultry Industry

Lubricating the meat and poultry industry

In the meat and poultry industry, the use of food-safe machine lubricants can mean the difference between a good name and no name at all.

Incidental oil contamination during the whole process needs to be avoided by meat and poultry manufacturers who process millions of kilograms of food for global markets every year.

Today major meat and poultry manufacturers are taking the risk out of their processes by switching to CASSIDA food grade lubricants as the safe alternative for all lubrication points in their production plants.

CASSIDA food grade lubricants

The production of food, beverages and related products puts the highest requirements on the lubricants used in the manufacturing process. Consumer protection is absolutely essential. In addition, ensuring that the production process runs smoothly and is highly effective (meaning longer component lifetimes and extended maintenance intervals) is our number one priority.

Our customers benefit from the excellent quality of the CASSIDA portfolio, which has been confirmed by numerous OEM approvals given by well-known manufacturers of production and manufacturing equipment.

Performance and safety

The CASSIDA range is NSF H1 registered as well as being the first food grade lubricant range to receive ISO 21469 certification. Certified for Halal and Kosher production, the CASSIDA range provides a total solution for the meat and poultry industry.

NSF registered
ISO certified

Nonfood Compounds
Program Listed

ISO 21469 certified

Kosher certified

Halal certified

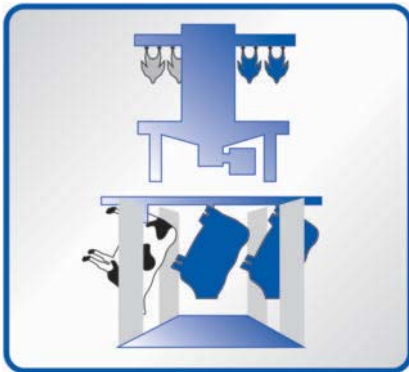

Our Support Package

As well as providing you with high-performance food grade lubricants, FUCHS LUBRITECH is able to offer expert technical advice and support. FUCHS LUBRITECH can assist

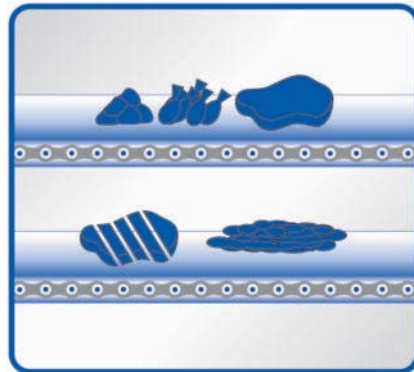

with oil condition monitoring, failure analysis and diagnosis, Lubrication Critical Control Point (LCCP) surveys and much more.

Basic Process Chart

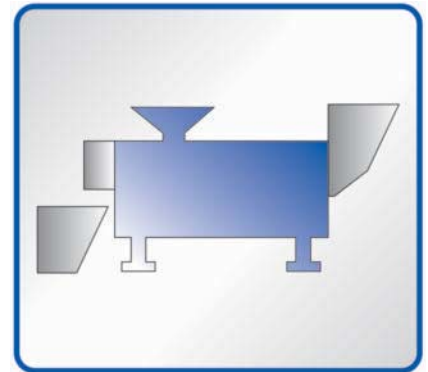

1 Slaughtering, Gutting, Butchering, Washing

2 Portions, Cutting Portions, Mincing

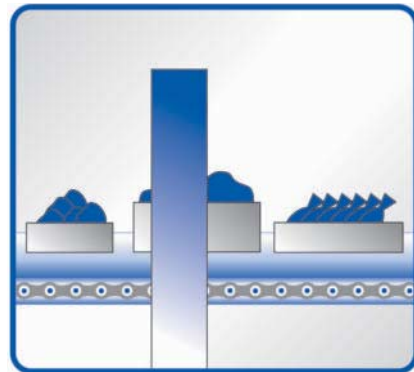

2A Seasoning, Mixing

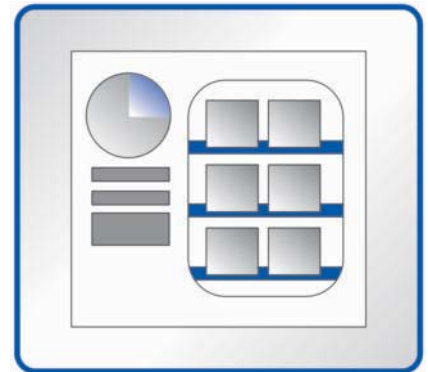

2B Forming, Cooking, Battering, Frying, Deep-Freezing

3 Forming, Filling, Labelling Packing

4 Storage, Cold and Frozen

NO.	MAIN PRODUCTS	PROCESS	COMMON MACHINE PARTS
