

YOUR EFFICIENCY IS OUR PASSION!

Specialty lubricants from FUCHS LUBRITECH

www.fuchs-lubritech.com

» With passion, we face the challenges of our customers, their equipment and the environment. Our specialty lubricants continually set new standards in their markets. «

Our motivation

Your efficiency

Moving sophisticated equipment smoothly: that's what motivates us at FUCHS LUBRITECH and makes our company one of the world's leading suppliers of specialty lubricants.

We are well known for our unique range of high-performance lubricants and release agents, in particular for the most demanding applications.

We are appreciated for our reliability, our industry-specific solution expertise and our flexible, dynamic business practices. We are measured every day by these values.

Our specialty lubricants make a substantial contribution towards the economical and more eco-friendly operation of high-performance equipment. We are geared towards the efficiency of your machines – your efficiency is our passion.

» Under the umbrella of FUCHS PETROLUB SE, we are the experts for highly specialised applications. We develop, produce and distribute our own world-leading branded products. «

Our company

Future-oriented

As a traditional medium-sized enterprise with strong roots, we are part of FUCHS PETROLUB SE, the world's largest independent lubricant manufacturer. With our specialised product range and world-leading brands, we operate flexibly and independently. As an internationally aligned company with its head office in Germany, we have more than 400 employees worldwide.

Over 60 years of experience – fit for the future

We concentrate on the development, production and distribution of trendsetting high-performance lubricants and release agents for the most demanding applications. Our core range encompasses more than 1,000 specialty products that are individually matched time and again to the application. We are continuously extending our product range on the basis of our experience and our industry knowledge.

Top product quality – made in Germany

Many of our products have long-since become household names in their branches of industry. Trust in our brands is based not only on our development strength, but also and above all on our excellent quality standards. Extensive certifications and OEM approvals, as well as the fulfilment of international standards, confirm our comprehensive quality management. Therefore, we are outstandingly well equipped to meet your requirements in the future as well.

» We concentrate on your branch of industry and we therefore have a specialised understanding of your individual technical requirements, based on which we develop comprehensive solutions. «

Our expertise

Industry-focused

Our specialty lubricants are the reliable solution for industrial applications in which the highest demands are placed on the lubricant employed. With our high technical consulting expertise and many years of experience in the most diverse branches of industry, we support the economic and process reliability of your application.

Whether high-performance lubricants for open gears, bearings or kilns in the **cement and mining industries**, low-temperature greases for arctic environments, NSF H1-registered lubricants for the **food and beverage industry**, bearing greases for the most economical long-term lubrication of **wind turbines** or sophisticated metal forming lubricants for outstanding parts quality in the **forging industry** – our employees in research and development and our local engineers ensure that the correct lubricant is always used to suit your particular requirements.

Our experts also advise you on the use of thermally stable lubricants in the **steel industry**, efficient release agents in the **refractory industry**, environmentally friendly and noise-reducing lubricants on **railways** and the use of high-quality concrete release agents and highly developed specialty greases for the effective operation of your machines and plants in the **construction industry**.

As a matter of course, we also offer highly specialised lubricant solutions for other branches of industry.

» We offer a wide variety of products for virtually every application. Our lubricants are available all over the world and impress with their performance and reliable quality. «

Our product range

Multifaceted

With over 1,000 different lubricants and release agents, our product range is unique in its variety and performance. Our brands represent top, long-standing quality and reliability. On this basis we can work in close dialogue with you to develop new high-performance lubricants tailored to your requirements.

» Our great innovative force makes us the technology leader and the in-demand development partner for you in your branch of industry. «

Our research

Innovation-driven

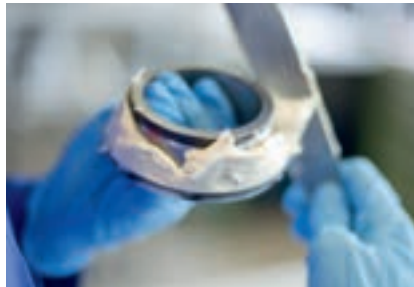

Industrial requirements – regardless of the branch – are ever-increasing in tandem with continuing technical progress. New machine designs with higher speeds, increasing loads, more demanding operating temperatures and stricter environmental regulations mean that lubricants and release agents are faced with increasingly complex challenges.

Concentration on research and development

We work non-stop to maintain the technological lead of our products. One in ten of our employees works in development. All customer solutions are subjected to extensive model and component tests in numerous test runs in our own development laboratories. State-of-the-art laboratories and comprehensive methods and test equipment are available for this.

Future-oriented production

We constantly invest in our technology and thus in the sustainability of our company. State-of-the-art production plants offer the best conditions for economical and environmentally oriented production. This naturally enables fast and targeted response times to customer requests.

» We strive relentlessly to meet and exceed applicable standards. That also applies to the protection of the environment. We want to be role models in setting sustainability standards. «

Our business practices

Sustainable

We bear a great responsibility for people, machines and the environment. That is why we pursue a corporate policy that regards economic efficiency and environmental protection as a single inseparable entity.

Environmentally friendly alternatives

We attach great importance to the manufacture of biogenic lubricants using regenerative raw materials. Today our product range offers environmentally friendly alternatives for many applications, which at the same time do not compromise on technical performance.

Exemplary solutions

In all our daily processes and in our strategic development we act to preserve the environment and resources. We strive towards exemplary solutions in recycling and the reduction of emissions. We attach importance to the use of environmentally friendly raw materials and the reduction of energy consumption. We continuously invest in modern, clean production and not least in intelligent, energy-optimised office buildings.

» With our global network of facilities we are able to stay close to our customers. That not only ensures excellent availability of our products, but also local service and support – the “human aspect”. «

Our facilities

International

Our facilities in Germany, the United Kingdom, France, Australia, the USA, Brazil, Japan, China and India, as well as distributors and partners in more than 60 countries, guarantee the global availability of our products. Our customers can always rely on a uniform quality standard worldwide – and equally on the dedicated, competent advice and support of our local experts.

» We regard service as a crucial and fundamental component of our business. We orient ourselves to your needs – and adjust ourselves to you. «

Our service

Customer-oriented

Satisfied and delighted customers are the top priority in our corporate philosophy. We offer a great many services to achieve that, ranging from customised product development and on-site technical consultation to an extensive programme of seminars and training courses for customers and sales partners.

Exemplary: service for large gears

One of our core competencies is the inspection, maintenance and repair of open gears in primary industry. All over the world, experienced service engineers assist with the commissioning and running-in of plants and perform regular inspections throughout the entire plant lifetime. Thanks to the comprehensive service package in conjunction with our adhesive lubricants, operational life of more than 40 years is possible.

Tailor-made: service for you

Whether you want skilled advice with a view to reducing your number of lubricants, an extension of lubrication intervals or HACCP analyses in the food and beverage industry, or customised surface treatment at our coating centre, we provide you with precisely the support that you need for a further optimisation of your use of lubricants.

» Together we tackle the most difficult tasks – and solve them with both experience and commitment in focused teamwork. We are there with you and for you. «

Our employees

Team-oriented

Leading technologies, an extraordinarily high rate of innovation, and economical and application-optimised customer solutions: none of that would be possible without the team-oriented cooperation within our company.

Team spirit: the driving force

Whether in development, in sales, in production, in service or in administration: our employees worldwide cooperate constructively and cross-functionally. They are bound by much more than just a common employer – they are bound by genuine team spirit as the driving force.

Knowledge: the key to success

We gain your trust through our expert lubricant knowledge, broad industry knowledge and comprehensive technological expertise. Together we strive towards 100% solutions for you. To do so we practise a corporate culture of openness and an intensive, interdisciplinary exchange of views.

What can we do for your efficiency?
